Winter Weather Safety

Working in Cold
Conditions

Slips and Falls

Winter Driving

Winterizing Facilities

Working in Cold Conditions

- What makes cold temperatures dangerous?
 - Hypothermia
 - Frost bite
 - Dehydration
 - Strains and Pulls

Physical Reaction to Cold

- Body attempts to maintain core temperature (98.6°F)
- Decreasing blood flow to extremities
 - Keeps internal organs warm
 - Increases chance of frostbite

Hypothermia

- Progressive loss of body heat
- Accelerates when wet from water or sweat
 - Most cases occur between 30°F and 50°F
 - Can occur in temperatures as high as 65°F
 - Can occur in 72°F water

Mild Hypothermia

- Shivering and chattering teeth
- Blue lips and fingers
- Poor coordination

Moderate Hypothermia

- Mental impairment and confusion
- Disorientation and poor decision making
- Inability to take precautions from the cold
- Slower heart and breathing rates
- Slurred speech

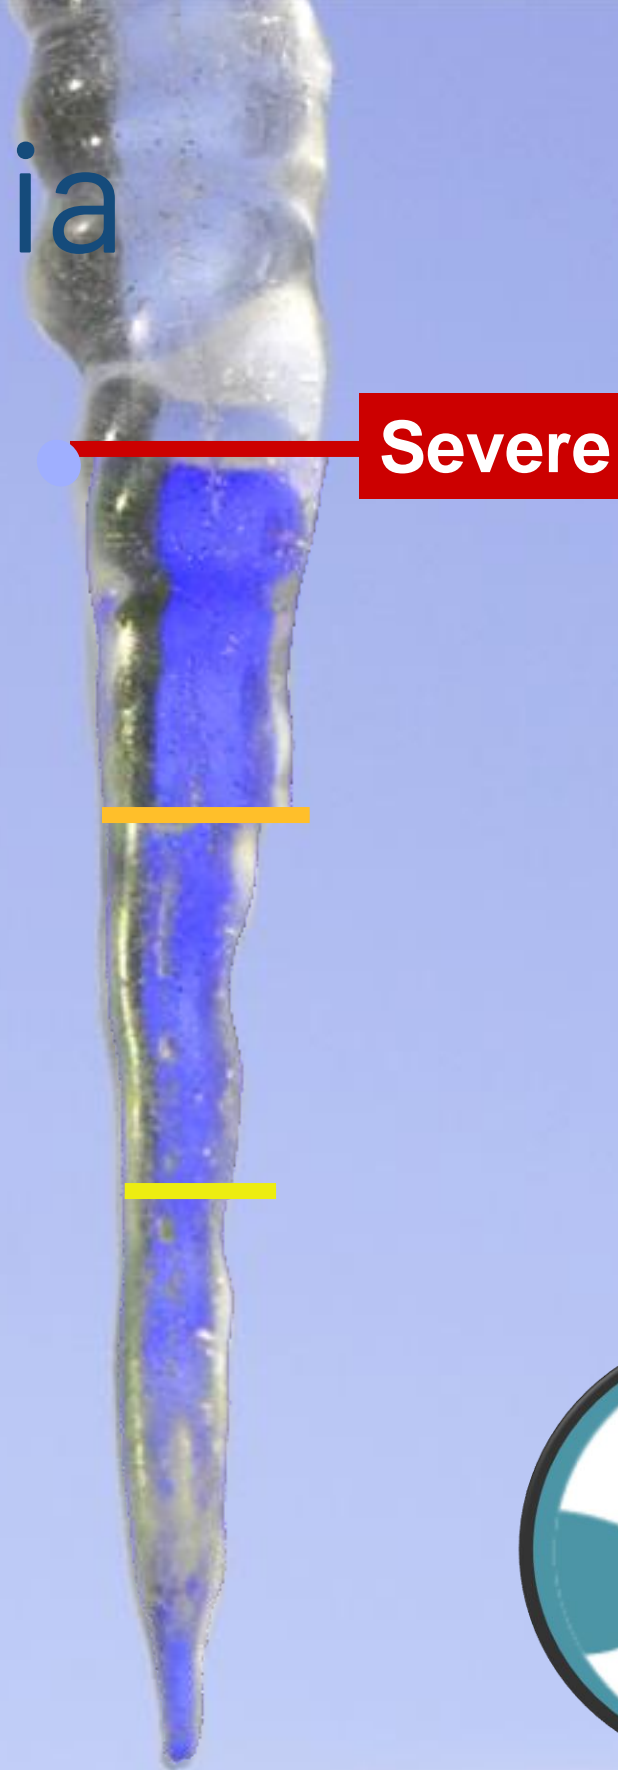

Moderate

Severe Hypothermia

- Resembles death
- Unconsciousness
- Irregular or hard-to-find pulse
- No shivering
- No detectable breathing

* * * * TREAT * * * *

If a person is experiencing hypothermia or frostbite...

FROSTBITE CAUTION

Since skin may be numb, victims of frostbite can harm themselves further.
Use caution when treating frostbite and:

UNLESS NECESSARY,
DO NOT WALK ON
FEET OR TOES
WITH FROSTBITE

DO NOT USE A
FIREPLACE, HEAT
LAMP, RADIATOR,
OR STOVE FOR
WARMING

DO NOT USE A
HEATING PAD
OR ELECTRIC
BLANKET FOR
WARMING

DO NOT RUB
OR MASSAGE
AREAS WITH
FROSTBITE

Dehydration

- Common problem in cold conditions
 - Tend to feel less thirsty
 - Sweat due to exertion or thick clothing
- Important to drink plenty of fluids

Strains and Pulls

- More common in colder temperatures
- Layer clothing
- Allow extra time to stretch and warm up prior to engaging in physically demanding activities

Slips and Falls

*16% of slips and falls
occurred on snow or ice*

What's in a Shoe?

High ankle support

Tread not overly-worn

Grooves widely spaced

Waterproof

Deep grooves

Flat heel

Winter Driving

- Pay attention to maintenance
- Use wipers, lights, etc.
- Clear windshield completely
- Allow more time
- Slow down
- Brake gradually
- Watch for ice
- Drive defensively
- Wear sunglasses

Stranded?

- Call for help
- Stay in the car
- Make car visible
- Run heat only periodically
- Travel with supplies

Emergency Preparedness Plan

- Assign responsibility to initiate the plan
- Establish contingency plans for staffing, fuel, equipment, fire protection, strategic shutdown, etc.
- Close facilities or delay opening or keep nonessential personnel out of the facility.
- Communicate with all employees, both on premises and off
- Train employees on applicable policies

Facility Preparation

- Inspect buildings – including idle facilities, equipment, etc.
- Schedule annual heating system maintenance in advance
- Maintain buildings at 40°F or above
- Install thermometers, especially in hard-to-heat areas
- Insulate piping
- Inspect roofs and create a snow removal plan
- Do not send workers onto the roof if it is in danger of collapse
- Drain equipment and lines that contain water
- Clear snow to designated snow placement areas
- Block walking areas under roof overhangs to prevent falling snow from creating a hazard
- Place “walk-off ” mats at entries during periods of rain or snow
